

1.  $n = 25, p = 10, \text{sim}a = 3$

→ Lasso seems to be best in this setting

2.  $n = 500, p = 10, \text{sim}a = 3$

→ Stepwise seems to be best in this setting

3.  $n = 50, p = 2, \text{sim}a = 3$

➔ Ridge seems to be best in this setting

4.  $n = 50, p = 30, \text{sim}a = 3$

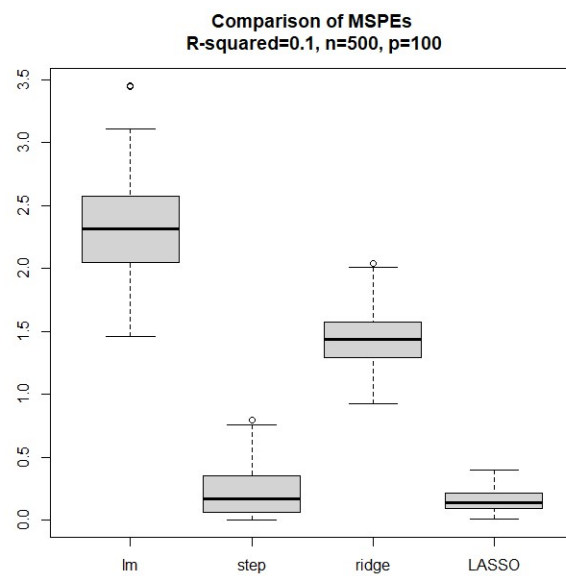

➔ Ridge and LASSO looks similar, but ridge seems to be slightly better than LASSO in this setting.

5.  $n = 50, p = 10, \text{sim}a = 0.5$

➔ Step seems to be best method in this function

6.  $n = 500, p = 100, \text{sim}a = 3$

-> Lasso seems to be best in this setting

7.  $n = 500$ ,  $p = 2$ ,  $\text{sim}a = 0.5$

→ Step seems to be best in this setting
